prints of the digital images stored on the at least one removable memory device and returning the prints to the photographer; and e) the photofinisher erasing the digital images from the at least one removable memory device and preparing the at least one removable memory device to be supplied to another photographer to repeat steps b) through e).

Re claims 31-32, the prior art fails to teach or suggest, "An apparatus comprising: a digital camera including a removable memory card having image data stored thereon; the removable memory card comprising a first portion of memory that is electronically readable by a photofinishing services provider but not by the digital camera, and a second portion of memory that is electronically readable by the photofinishing services provider and by the digital camera; **and the first portion of the memory comprising a code for indicating to the photofinishing services provider that the removable memory card carries with it a commitment to create prints**".

Re claims 33-34, the prior art fails to teach or suggest, "An apparatus comprising: a memory card capable of being electronically coupled to a digital camera having image data stored thereon; the memory card comprising a first portion of memory that is electronically readable by a photofinishing services provider but not by the digital camera, and a second portion of memory that is electronically readable by the photofinishing services provider and by the digital camera; the second portion of memory having said image data stored thereon;
